Last Updated Wednesday, 21 September 2016

Meetings between patients, stakeholders, state and local governments, and concerned citizens are concluding and the time for those government agencies to codify the regulations for the licensing and safety of medical cannabis is drawing near. Once the first draft of these regulations are published, there will be a public comment period to help dial in the wording. We will keep this page informed as they are introduced. Here is a link to a news report about the California Bureau of Medical Cannabis Regulation's (BMCR) pre-regulatory meeting held Tuesday, September 20 in Citrus Heights.
