On the second Saturday of the month of November, we will again host Green Style Consulting for product testing. At \$40 for a single test and \$35 for multiples, this is the ideal way to check for not just THC, but also for those going for a stronger Cannabidiol - CBD product. Just a gram of dried material is needed to test. The fun starts at noon. You don't have to be testing to come by and check out the process as Green Style technicians set up their gas chromatograph, explain the details of testing, and share their scientifically derived methods to enhance potencies and production.

Samples can be dropped off early. Call for details.

Being harvest time, we'll have a little something extra in festivities like food and live music!

Walking Spanish and Island of Black and White will be here.
